OBJECTIVE

I have a good understanding in designing and implementing scalable web applications using modern frameworks and technologies. Skilled in front-end development with HTML, CSS, React as well as back-end development with languages like Java and frameworks of Java like Hibernate and Springboot. Good analytical skills and a passion for staying up-to-date with the latest trends and best practices in software development.

EDUCATION

| | |
|---|------------|
| B. Tech (CSE) | July 2024 |
| Maharashtra Institute of Technology, Aurangabad | CGPA: 8.86 |
| Class XII | May 2020 |
| Deogiri College, Aurangabad | 54.22 |
| Class X | May 2018 |
| St Mary's High School, Jalna | 78.85 |

SKILLS

| | |
|-------------------------------|--|
| Programming Languages: | Core Java, Hibernate, Springboot |
| Database Technologies: | MY-SQL, Oracle, MongoDB. |
| Web Technologies: | React, HTML, CSS, JavaScript, Bootstrap. |

PROJECTS

Paw Petopia: Build a platform where users can browse and adopt pets. Detailed profiles for each pet, including photos, descriptions, and care instructions. Search and filter options to find pets based on specific criteria (e.g., species, age, care needs). Chat: Users can chat with pet owners to ask questions and learn more about pets through chat audio/video call allowing users to interact with pets and their owners in real-time.

TechStack: Java, Springboot, ReactJS, JavaScript, HTML, CSS, SQL.

Bank Management System: Developed a Java-based Bank Management System that enables users to create bank accounts by collecting their details and generating unique account numbers. The system includes a feature to display account details using the account number for easy access. Additionally, implemented a secure ATM transaction module with PIN validation, allowing users to perform deposits and withdrawals seamlessly.

TechStack: Java, Springboot, ReactJS, JavaScript, HTML, CSS, SQL.

Ashoka: This Android application is specifically developed for Ashoka to efficiently manage their large workforce. The app aims to streamline administrative tasks and improve overall labor management. Additionally, it provides a user-friendly interface for both managers and workers, ensuring smooth and effective communication within the firm.

TechStack: ReactJS, JavaScript, HTML, CSS.
